

MR. ROBOT

1. This is similar to the first challenge in this section but this time there's a photo instead of co ordinates

2. PNG shows what looks like a theme park but the big hint that can be notice is the logo to that. Tineye that was used in the previous challenge will work on this.

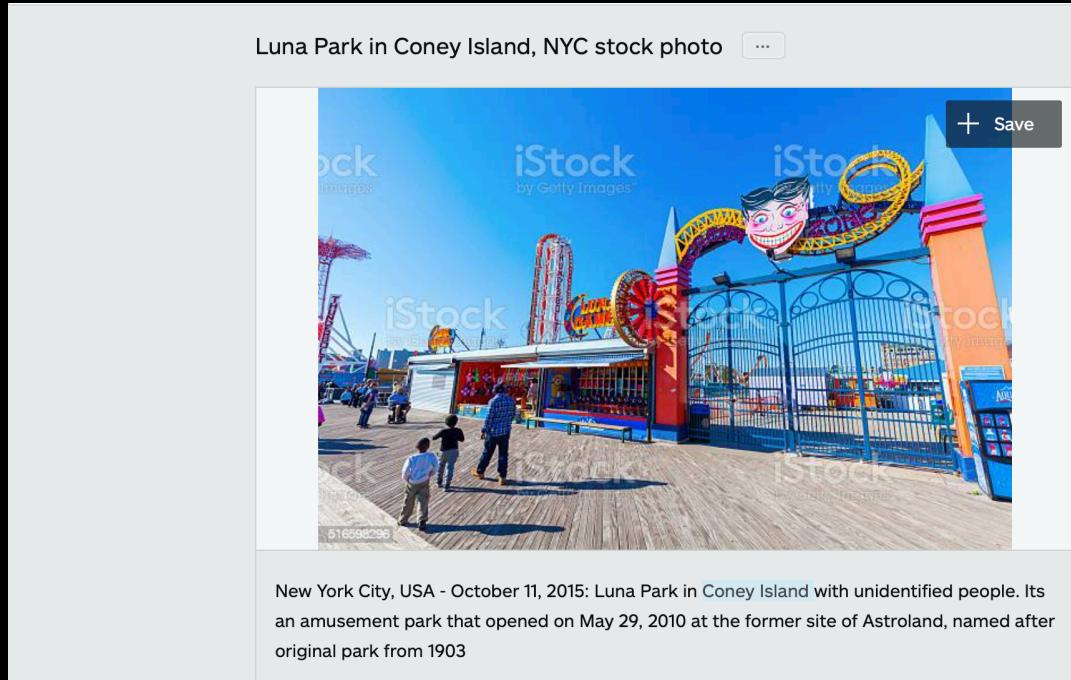

3. A few searches came up when uploading this to tiney.

The screenshot shows the TinEye search interface. At the top, there's a logo and navigation links for 'Search', 'Technology', and 'Products'. Below that is a blue header bar with 'Upload' and 'Picture' buttons. The main area displays '3 results' found over 46.7 billion images in 0.8 seconds. It includes a note about being private and free for non-commercial purposes. A filter option for 'stock and collection' is shown, with 2 results found. Below this, there are two search results listed:

- STOCK - SPONSORED** www.alamy.com
image: [http://www.alamy.com/image-details-popup.asp?imageId=\(9413B398-98E8-44FB-B68C-ACE91B964F4C\)](http://www.alamy.com/image-details-popup.asp?imageId=(9413B398-98E8-44FB-B68C-ACE91B964F4C)) 2, 2014
- lori.ru**

4. So this theme park is called Luna Park and its located in Coney Island New York City. So that means the flag is either Coney Island or New York City or them both together.

4. By trying multiple different variations CONEYISLAND is the correct one for this flag.

Weird Right?

400

I've seen that face before but where? The flag is the location,
have i been there?
